

Sprint 3 Report

Team Name: iM Keys

Team Product: iOS Easy Keyboard

Sprint completion date: 7/23/19

Actions to stop doing

None. We didn't actively do anything unnecessary or detrimental to our project or productivity

Actions to start doing

Have daily scrum meetings more consistently. Due to conflicting class schedules and work loads, we weren't able to keep as organized as we could have in a setting like a full time job. We should have just decided on a schedule and stuck to it but we got lazy since we thought it was unnecessary, but it made us less productive even if we finished what was needed by the end

Actions to keep doing

Keep up prompt communication on what was done so no one would do unnecessary work.

Work completed

US 1 Task 1: Improve button shape and layout (2)

US 2 Task 1: Improve general UI (2)

US 3 Task 1: Make the UI relative to work for all iOS devices (2)

Work not completed: none

Work completion rate

Total number of completed US: 3

Estimated total ideal work hours: 6

Total days of sprint: 7

US/day = 0.429

Work hours/day = 0.857
