Sprint 1 Report

Team Name: iM Keys

Team Product: iOS Easy Keyboard

Sprint completion date : 7/8/19

Actions to stop doing

Our progress was good enough to complete most tasks for last sprint.

Actions to start doing

For more effective parallel development, we should be more used to GitHub. The team should be more accurate at estimating work tasks, since estimated task time was not quite exact.

Actions to keep doing

Frequent Slack communication was helpful, so it has to be done.

Work completed

US 1. Task 1 : Make an Image which looks like keyboards (2)

US 2. Task 2 : Implement the key model (0.5)

   Task 3 : Build a controller to identify which key is pressed (1.5)

   Task 4 : Using controller, change view if a key is pressed (2)

US 3. Task 1 : Search for sound synthesis API (2)

   -Task 2 : Implement the pitch model of keyboard(0.5)

Work not completed

US 1. Task 2 : Make an static iOS app that uses keyboard from task 1 as a view (2)

US 2. Task 1 : Make an Image which looks like pressed keyboards (1)

US 3. Task 3 : Modify controller to generate sound if a key is pressed (1.5)

Work completion rate

Total number of completed US : 0

Total number of ideal completed work time : 8.5

Total days of sprint : 6

US/day = 0

work hours/day = 1.417
